

IN ONE DAY!

Refinishing : Is the art of taking one chips, rust, cracks, stains, dull bathtub and making it into something new. It's a transformative art that can renew and revitalize.

We combine the energy of doing a good job with a healthy respect for our clients. We strive to create something truly new and wonderful with every project, so that each is as unique as our client's dream.

"Affordable Price"

Quality Work !

In Touch Refinishing

Welcome!

For over many years, we have specialized in turning the dreams of our clients into reality.

-Surface Transformation

We guarantee quality in all our work and, most importantly, timely results.

-- On Time, Every Time

Every contract has a pay for performance clause written in it in plain English, so you know that if your job isn't completed on time, you're protected.

New Finish !

We are confident in our products and services that we stand behind with a written warranty. All of our technicians are specializing in acrylic bath Refinishing. You have the choice of refinishing or replacement. Think again about replacement. Replacement, especially bathtubs, includes expensive tradesmen and a week of hassles. Frequently demolition is required. That means noisy, dusty work that causes damage to your floors, walls and plumbing. Not to mention the cost savings. Replacing a tub can cost \$2,000 to 5,000 we specialize in the following services: Bathtub and Tile Refinishing Topcoat Coatings The best bathtub and tile refinishing topcoat coatings are two-component urethanes, which utilize a resin, catalyst, and reducer. Two-component urethanes offer increased cross-link density, which translates to superior impact, stain, and chemical resistance.

Restoration !

Almond Finish

Will resurfacing take care of chips and other damage?

Chips, cracks and other damage in the original surface should always be repaired before refinishing.

Different repair materials are used, depending on the original surface. For instance, the materials used to repair fiberglass is different from that used on an acrylic surface
